AYER'S Ague Cure.

Intermittent Pever, or Fever and Ague, Remittent Pever, Chill Fever, Dumb Ague, Periodical Headache, or Bilions Headnche, and Biffous Fevers, indeed for the whole class of diseases originating in biliary derangement, caused by the Malaria of miasmatic countries. No one remedy is louder called for by the ne-

cessities of the American people than a sure and safe cure for Fever and Ague. Such we are now enabled to offer, with a perfect certainty that it will enalisate the disease, and with assurance, founded on proof, that no harm can arise from its use in any quantity.

That which protects from or prevents this disrder must be of immense service in the communities where it prevails. Presention is better than cure, for the patient escapes the risk which he must run in violent attacks of this baleful distemper. This "Cure" expels the miasmatic prevents the development of the disease, if taken on the first approach of its premonitory symptoms. It is not only the best remedy ever yet discovered for this class of complaints, but also the cheapest. The large quantity we supply for a dollar brings it within the reach of every body; and in bilious districts, where Frynk and Arten prevails, every body should have it and use it freely both for cure and protection. It is hoped this price will place it within the reack of all - the poor as well as the rich. A great superiority of this remerly over any other ever discovered for the speedy and certain ours of Intermittents is, that it contains up Quinine or numeral, consequently it produces no quinism or other injurious effects whatever upon the constitu-

tion. Those cured by it are left as healthy as if they had never had the disease. Fever and Ague is not along the consequence of the miasmatic poison. A great variety of disorders arise from its irritation, among which are Neural-gia, Rheomatism, Gout, Headache, Blindness, Toothache, Earache, Catarrh, Asthma, Palpitation, Painful Affection of the Spleen, Hysterics, Pain in the Bowels, Colic, Paralysis, and Derangement of the Stomach, all of which, when originating in this cause, put on the intermittent type, or become riodical. This "Crue" expels the poison from the blood, and consequently cures them all alike. It is an invaluable protection to immigrants and rsons travelling or temporarily residing in the malarious districts. If taken occasionally or daily while exposed to the infection, that will be excreed from the system, and cannot accumulate in sufficient quantity to ripen into disease. Hence it is even more valuable for protection than cure, and few will ever suffer from Intermittents, if they avail themselves of the protection this remedy

Ayer's Cathartic Pills, FOR ALL THE PURPOSES OF A FAMILY PHYSIC, are so composed that disease within the range of their action can rarely withstand or evade them. Their penctrating properties search, and cleanse, and invigion of the human organism, correcting its every parties of the numan organism, contexting the diseased action, and restoring its healthy vitalities. As a consequence of these properties, the invalid who is bowed down with pain or physical debility is astonished to find his health or energy restored by a remedy at

nce so simple and inviting.

Not only do they care the every-day complaints of every body, but also many formidable and dangerous liseases. The agent below named is pleased to furnish gratis my American Almanae, containing certificates. of their cures and directions for their use in the following complaints: Coefficients, Hearthurn, Headache, trising from disordered stomneh, Naussen, Indigestion, Pain in and Marked Inaction of the Bowels, Flatulency, Loss of Appetite, Jamilire, and other kindred com-plaints, arising from a low state of the body or obstrucion of its functions. They are an excellent alterative tone and strength to the system debilitated by disease.

Aver's Cherry Pectoral, FOR THE NAPID CURE OF Coughs, Colds, Influenza, Hoarseness, Croup,

Bronchitis, Incipient Consumption, and for

the relief of Consumptive Patients in advanced stages of the disease. So wide is the field of its usefulness and so numerous re the cases of its cures, that almost every section of country abounds in persons publicly known, who have een restored from alarming and even desperate disses of the large by its use. When once tried, its periority over every other medicine of its kind is too arent to escape observation, and where its virtues e known, the public no longer hesitate what autidots to employ for the distressing and dangerous affections of the pulmonary organs that are incident to our climate. While many inferior remedies thrust upon the community have failed and been discarded, this has rained friends by every trial, conferred benefits on the afflicted they can never forget, and produced cures too merous and too remarkable to be forgotten.

A SURE AND RELIABLE INDICATOR OF THE STATE OF THE WEATHER,

Indicating Unvariably from 24 to 48 hours in advance. In advance.

I OUIS ULLMAN, the Discoverer of this curious and beautiful a exotic, which is a native of the Arabian Desert, near Damacus, in Asia, was the first to apply it to the purpose of a Weather Indicator, having discovered its wonderful qualities by a minute examination in the native land of the plant.

Though a regutable production, the Natural Weather Indicator, is indestructible, and will continue to perform its functions for all times, in any climate and at all seasons, though a subsumped in all the strongest acids known to chemists, including Nitric, Nitro-Muriatic, Sulphuric, &c., to boiling water and boiling oil, and ice water, it remains intact, and continues its performances unimpaired, losing mone of its pensitiveness or capacity, and will not decay like other organic or artificial substances used for such

far purposes.

The "Natural Weather Tedicator" can be procured for the low price of \$1.0°, prognosticates the weather with equal certainty and durability, as the Barometer, which costs \$25 to \$35, and \$18. seasily impaired.

The NATURAL WRATHER INDICATOR was never known to the The NATURAL WEATHER INDICATOR was never known to the world before introduced by the subscriber, and he new for the first time offers it to the public for sale. Its wonderful properties have asterished the scholars and scientific men of Europe and America. It is so simple and imangeable that no difficulty will be found in testing its value. The discoverer is not under the necessity of exping anything in its ments on his own responsibility, as he is permitted to offer certificates from gentlemen who have tested it, of such a character as to put all doubt at rest.

By permission I refer to the following manual gentlemen, some of whom have tested the indicator for a number of years, and others for several months, all of whom have no hesitation in recommending it to the favorable notice and use of the public in commending it to the favorable notice and use of the public in

A Contrast. A few months ago, says the Richmond Disputch, the plains of Picdmont and Lumbardy, the most beauti-

ful and fertile portion of Europe, were rich in the glories of spring, and rej string in the promise of a pleateons harvest. The inoffensive peasantry were cheerfully pursuing their honest labor and cheering themselves with the prospect of a fruitful season, whilst their humble cottages were the abodes of peace and purity. Health and happiness brightonelevery face; no harm was done by man to his fellow; even the poor dumb beasts, performed securely and faithfu'ly their part in the useful tell of the day and erjoyed undisturbed the sleep of night. A scene of more exquisite repose than a Pied-

mont landscape, at vunset, as it has been described by travelers, sung by poets, and sketched by artis's, it would be difficult to find on this troubled earth. One might well exclaim, upon looking upon such a scene, as it appears to us in pictures and graphic descriptions, "If there's peace to be found in the world, it is here, it is here!" But what a fearful change. The sudden tornado that lushes a placid sea into commatin, and strews the shores with shipwreck; the volcano that pours its tide of lava upon the plain, and buries cities beneath a river of fire, does not work as terrible and as sad a destruction. If, instead of Z waves and Turons from Africa, we such engagements. could imagine all the beasts of proy of that confinent let louse during file night in enermous droves upon the cortages and flocks of Piecmont and Lonbardy, they could not stain with blood as many bardy, abeliabling the old Austrian laws, which, thresholds; they could not pile the plains with as many victims; they could not leave such incurable lacerations in buman hearts, as the more sanguinary and destructive human brutes where diabolical warfare has converted that Paradise into a Pan-

Harvests trampled down, women dishonored, towns given to flamer, boys of sixteen made food wounded and dying, a hundred thousen I men placed hors de combat in a month, the corpses of the unburied dead, ghastly and hideous with putrefication, lying side by side with the slain asimals, and together breeding a fearful pestilence! Such are the scenes which are now presented in a country which, only last spring, was the most serens and lovely apot of the earth, smiling in content and security, and brilliant with hope and happiness.

Barrist Statistics .- The Minutes of the State Convention of 1859, present the following interesting statistics of the Baptist denomination in Geor-

Number of associations, sixty-four; number of churches, including eighty-nine in adjacent States. one thousand four hundred and six; number of members, including three thousand one hundred and forty four in adjacent States, ninsty-three thousand four hundred and forty-seven; number baptised last year, seven thousand seven bundred and fifty-nine; number of ordained ministers, seven hundred and sixty-nine; number of licentiates, two hundred and eleven; gain in membership, compar ed with previous year, seven thousand six bundred FLANNELS. and sixty-five; amount contributed for missions, so far as reported in the minutes of associations and conventions, ninetsen thousand four hundred and

eighty-seven dollars and two cents. MEN AND ARMS FOR MEXICO. - We learn that the Tennessee brought up on her last trip, from Gen-Garza, of the State of Tamaulips, a request for, or invitation to, 3000 Americans, to pursue the civil | Bock Manufacturing Company, war in Mexico. At the time of writing, Gen. Garra New England Manufacturing Company, was at Vera Cruz; but we do not understand he acts from the authority of the Constitutional Government there located, though doubtless with its acqui-escence. The expedition is to be fitted out at Tamsolely under the State authority. In other words, Gen. Garra and the State of Tamaulipas propose to do something on their own account towards restoring the presuge of Constitutional arms, and for this purpose they divest themselves of a well known national prejudice, and call upon our "bravest" for assistance $-N.\ O.\ Picsyune,\ July\ 20.$

The Heated Term in California. The weather has been excessively hot throughout California. The air at Santa Barbara was a genuine sirocco. The correspondent of a San Francisco

paper, writing from there, says: irst . (June.) a burning wind came upon us from the northwest, and smute us with terror. At 20'cleck the thermometer exposed to the wind rose to 133 degrees of Fahrenheit; at five o'clock it had fallen to 122 degrees, and at 7 o'clock it stood at 77 degrees, where it had been in the morning
"During the whole duration of this visitation ev-

evry one staid within doors, taking good care to keep doors and windows closed. "A fisherman who was out at sea came back with his arms all blistered. Many calves, rabbits and birds died of suffocation. "The greatest losses are among the vegetables; the

fruit trees are all burned, and the pears and apples have been literally cooked." In Sacramento the thermometer for ten days rarely fell below 100 degrees, and often reached 106. The heat at Timbuctoo, Yuba county, caused the thermometer to rise to 121 degrees on the 22d ult.

At Ophir, the thermometer stood at 114 in the shade, for three conscutive hours. At Gold Hill, it was 116. At Main Bar, on the American river, 120. At Mountain Springs, 110. The mercury ranged about 10 higher than the above figures when the thermometer was placed in a framed building. On Thursday, however, we were blessed with a little less heat; and as we write (Friday aftermoon, the 17th,) the mercury is only up to 99 -and all hands enjoying the cool weather immensely. On Sunday the 19th, the mercury rose to 100 in the coolest part of San Andreas; on Monday to 108 —standing at that point for over two hours; on Tuesday, by 11, A. M., it reached 106; by 1 P. M., 108; by 4 P. M., 110; on Wednesday, at 11 A. M., 108; 2 P. M., 112.

On Wednesday last, the thermometer in Benicia stood at 102 deg., and on Friday at 101 deg.

In Oroville, the weather during the past week has been decidedly warm, the thermometer in the courthouse ranging 110, and in Wells, Fargo & Co.'s Express office as high as 114 deg

The hottest weather ever known in the State, says the Shasta Courier, has been experienced during the past week. In some places, in brick buildings, the mercury rose to 118 deg.
On Thursday, the 23d ult, the heat between the Stanislaus and Tuolumne rivers was excessive. The thermometer was 113 degrees in the shade The wind was avoided, as it was heated so that it felt as if actually burning the flesh. The last four or five days, says the Trinity Journal, have been hotter than ever before known here. On Tuesday the mercury reached 103 degrees in

the shade; on Wednesday, 106 and on Thursday 105 degrees. The heat has never been more oppressive at Mariposa, says the Gazette, than during the past two The thermometer has ranged in the middle of the day from 110 to 118. The Brouth in Indiana.

We have received enough news from different parts of the State to get an idea of the extent and character of the drouth which threatens to blast all the high hopes of the year. In the east, southeast, centre and northeast, the want of rain has been more severely felt than in other parts of the State. Rains have fallen, it is true, in scattered or small showers, but the general condition of the territory thus defined is that of serious suffering from drougth. In the north, generally, and along the Wabash river, and in the south, the drouth has in some degree broken up.

It did prevail to an almost alarming degree, but last Monday's raio, which seems to have extended pretty much over the whole Wabash Valley, except the extreme eastern end, has washed it away for the time, and the rain of Saturday week did as much for the country along the Ohio as far as Evansville. The roads were very heavy with mud in Posey and Pike counties, on Saturday, till within a short distance of Petersburg, where, as in this city, no rain has fallen since the 2d.

Potatoes have probably suffered more than corn, but corn must be pretty hardly handled when it begins tasseling at three feet in height, as it is doing in many places. We believe that if the whole State were now visited by abundant rains, both corn and potatoes are damaged too much to yield more than

Treaty With Mexico. The Washington correspondent of the New York limes telegraphs to that paper under date of the 5th, as follows:

The draught of a treaty just sent here by Hon. Robert McLane to be submitted to our Government, contains provisions of the very highest importance to this country. I am fortunarely enabled to furnish you with a summary of its most important stipulations, which are as follows: Ist. Rights of way across the Northern States etween the Rio Grande and forts on the Gulf of

California, with guarantees for their protection and 29. Rights of way and valuable privileges of ransit secured to the American Company holding the Isthmus of Tebuantepee.

3d. The privilege of creeting and maintaing warehouses at the termini of the neveral transit

4th. The right of transporting troops and munitions over such rouses, and to send troops and protect them in default of Mexico fulfilling that 5th. Free entry and transit of goods belonging or copelgred to American citizens of Arizonia through the ports of the gulf and California and

6th . Entire and anquastionable freedom of religious opinion and religious worship throughout the 7th. A clause indicating the willingners of the Mexican Government to accept a modified form of protectorate at the hands of the United States; in other words, to solemaire another treaty in form of alliance, offensive and defensive, but in ubstance creating a protectorate whenever the United States shall signify its willingness to enter into

Beligious Liberty in Lombardy. Ruw Your, July 25. The Piedmonters Gazele

of their religious opinions.

These laws, it is observed, are contrary to the equality of citizens in the eye of the law which pre-vails in other paris of the Manarchy, and are incompatible with the principles of modern civilizaprovinces all the citizens, whatever the religion they profess, are equal before the law, and shall equally enjoy all civil and political rights as in the for powder and bayenes, hospitals overrun with elder provinces of the Monarchy. All orders and regulations of contrary effect are abrogated. The New York papers are generally disappointed
